M. Inokuti xiii

Section I. Target Excitation and Stopping

Bloch correction in stopping and seeming paradoxes in Rutherford scattering
J. Lindhard 1
Charge exchange, energy loss and related electronic processes of ions in matter
A. Arnau 2
Interaction of heavy ions with plasmas
J. Jacoby, Ch. Bickes, H.-P. Flierl, D.H.H. Hoffmann, M. Dornick, K. Weyrich, C. Stöckl and H. Wetzler 7
Inelastic mean free path of H^+ and He^+ with the energy of $\sim$ 100 keV in carbon film
N. Matsunami 14
Resonant effects in the stopping power of clusters
F.J. Pérez-Pérez, I. Abril, N.R. Arista and R. Garcia-Molina 18
Multi-pair excitations in an electron liquid
M.E. Bachlechner, A. Holas, H.M. Böhm and A. Schinner 23
Stopping power obtained from complex backscattering spectra: the isotopes of magnesium
P. Fischer, Ch. Eppacher, G. Höfler and D. Semrad 27
Energy loss of light ions scattered off Al(110) single crystal surfaces at low energy
S. Hausmann, C. Höfner, T. Schlathölter, H. Franke, A. Närmann and W. Heiland 31
Stopping powers and energy straggling for 50–300 keV H^+ in amorphous Si and Ge films
A. Ikeda, K. Sumitomo, T. Nishioka and Y. Kido 34
Calculations of electronic energy loss of fast molecules in amorphous carbon
J. Jensen and H.H. Mikkelsen 39
Energy-loss and straggling of molecular ions moving in solids
T. Kaneko 43
Stopping power dependence of luminescence from thin carbon foils bombarded with medium velocity heavy ions
H. Kobayashi, H. Shibata and N. Oda 47
Position-dependent stopping of 12.5–30 keV He^+ ions at crystal surface
K. Narumi, F.-h. Kato, Y. Fujii, K. Kimura and M.-h. Mannami 51
Energy loss distribution of H_2^+ with $\sim$ 100 keV in thin carbon films
N. Matsunami 55
A model for the velocity-dependent screening
I. Nagy and A. Bergara 58
Reliability of available stopping cross section data for protons in fluorides
V. Nečas and A. Brandstötter 62

0168-583X/96/$15.00 Copyright © 1996 Elsevier Science B.V. All rights reserved

Energy loss of high velocity $^{6}Li^{2+}$ ions in carbon foils in charge state non-equilibrium region
H. Ogawa, I. Katayama, I. Sugai, Y. Haruyama, M. Saito, K. Yoshida and M. Tosaki 66

Nonlinear quantum hydrodynamical model of the electron gas
A. Bergara, J.M. Pitarke and R.H. Ritchie 70

Coherent double-plasmon excitation in solids
I. Campillo and J.M. Pitarke 75

Directional characteristics of the generalized oscillator strengths for some low lying transitions in H_2
J.R. Sabin and J. Oddershede 79

Stopping powers of carbon for protons from 4 to 13 MeV
N. Sakamoto, H. Ogawa and N. Shiomi-Tsuda 84

Stopping powers of Ta and Mo for MeV protons
N. Shiomi-Tsuda, N. Sakamoto and H. Ogawa 88

Investigation of the influence of impact parameter selection on energy loss measurements in gases
E. Steinbauer, A. Salin, A. Arnau, R. Diez-Muiño, F. Kastner and P. Bauer 93

Measured stopping powers for 1–6 MeV ^{7}Li ions in C, Al, Cu, Ag, Au and Pb foils and in a thin Si crystal
Z. Li, Z. Zhou, G. Zhao, J. Tang and F. Yang 98

Impact-parameter dependence of inelastic energy losses in slow atom–atom collisions
I.S. Tilinin 102

Stopping mechanisms of negative heavy particles in gas targets
G. Schiwietz, U. Wille, R. Díez Muiño, P.D. Fainstein and P.L. Grande 106

Section II. Projectile Excitation, Capture and Loss

Statistics of projectile states and correlated phenomena for penetrating ions
P. Sigmund 111

Charge states of fast heavy ions in glancing collisions with aligned atoms in single crystals
H. Kudo, A. Tanabe, T. Ishihara, S. Seki, Y. Aoki, S. Yamamoto, P. Goppelt-Langer, H. Takeshita and H. Naramoto 125

Formation of negative ions in grazing scattering from a LiF(100) surface
H. Winter, C. Auth and A.G. Borisov 133

Resonant electron transfer between highly charged ions and metal surfaces: first-order vs. nonperturbative transition rates
A.G. Borisov and U. Wille 137

Formation of H^- on thin aluminum films
A.G. Borisov and H. Winter 142

The influence of multiple scattering and Coulomb repulsion on the transmission of H_2^+ through solid targets
N.E. Capuj and M.M. Jakas 146

Adiabatic evolution of the H(1s) resonance near an aluminium surface
S.A. Deutscher, X. Yang, J. Burgdörfer and H. Gabriel 152

K Auger electron emission from hollow Ne atoms in solids
M. Grether, A. Arnau, R. Köhrbrück, A. Spieler and N. Stolterfoht 157

Observation of surface rippling on $Cu_3Au(100)$ with ToF-ISS
L. Houssiau and P. Bertrand 161

Energy loss of highly charged ions on an aluminum surface
N. Hatke, A. Hoffknecht, S. Hustedt, J. Limburg, I.G. Hughes, R. Hoekstra, W. Heiland and R. Morgenstern 165

The dependence of the energy losses of molecular ions and their fragments on the exit angle from a thin target
A.A. Bednyakov, V.Ya. Chumanov, O.V. Chumanova, G.A. Iferov, V.S. Kulikauskas, I.I. Rasgulyaev and Yu.N. Zhukova 168

Interaction of multiply charged ions with metals
J.I. Juaristi and A. Arnau 173

L X-ray emission from slow multiply charged Ar ions bombarding Be and Al targets
S. Ninomiya, Y. Yamazaki, K. Sawatari, M. Irako, K. Komaki, T. Azuma, K. Kuroki and M. Sekiguchi 177

Effective charge parameters for ^{7}Li, ^{11}B, ^{12}C, ^{14}N, and ^{16}O projectiles traversing Kapton targets
L.E. Porter 181

Orientation dependence of the projectile X rays from highly stripped S and Cl ions channeled along ⟨100⟩ Si crystal
V. Nanal, L.C. Tribedi, M.B. Kurup, K.G. Prasad and P.N. Tandon 184

Charge state fluctuations: a master equation approach
A.K. Prinja 187

Growth and structure of thin Pt films on Cu(111) studied by low energy Li^{+} ion scattering
Y.G. Shen, D.J. O'Connor, B.V. King and R.J. MacDonald 191

Inelastic energy loss of recoiled hydrogen ions in low-energy He^{+}, Ne^{+} and Ar^{+} collisions with hydrogenated silicon surface
F. Shoji, A. Yamada and K. Oura 196

Multiple scattering in the interaction of low energy ions with a cold Zn(0001) surface covered by condensed carbon dioxide
W. Soszka, M. Baster and D. Sitko 200

Scattering of fast H_2 molecules from Pd surfaces: classical trajectory simulations
M. Vicanek, T. Schlathölter and W. Heiland 206

Formation of hydrogen atoms in grazing scattering from an aluminum surface
H. Winter and A.G. Borisov 211

Evidence for convoy-electron shifts due to induced potentials
G. Xiao, G. Schiwietz, P.L. Grande, A. Schmoldt, M. Grether, R. Köhrbrück, N. Stolterfoht, A. Spieler and U. Stettner 215

Kinetic electron emission in keV ion–surface collisions
G. Spierings, I. Urazgil'din, P.A. Zeijlmans van Emmichoven and A. Niehaus 220

Section III. Excitation and Secondary Particle Emission

Interaction of slow multicharged ions with solid surfaces: current concepts and new information on slow electron emission
HP. Winter, M. Vana, C. Lemell and F. Aumayr 224

Transport of fast electrons near surfaces
C.O. Reinhold, J. Burgdörfer, K. Kimura and M.-h. Mannami 233

On the formation of hollow atoms in front of an insulating LiF surface
J. Limburg, S. Schippers, R. Hoekstra, R. Morgenstern, H. Kurz, M. Vana, F. Aumayr and HP. Winter 237

Electron emission yield for impact of swift bare light ions on metals
O. Benka, A. Schinner, T. Fink and M. Pfaffenlehner 242

Kinetic energy distributions of secondary molecular ions from thin organic films under ion bombardment
A. Delcorte and P. Bertrand 246

Microscopic considerations concerning the relation between electron yield and stopping power: calculations for aluminium and carbon
A. Dubus and M. Rösler 251

The production of high-energy electrons during low energy atomic collisions in solids
M.M. Jakas 255

Charge-state dependence of the forward/backward secondary electron yields from carbon foils induced by MeV oxygen ions
T. Kaneko and Y. Mitsunobu 261

Comparative study of kinetic electron emission from solids under ion and electron impacts
K. Ohya and J. Kawata 265
Spectroscopy of the Cu $L_3M_{4,5}M_{4,5}$ Auger line excited by grazingly incident MeV protons on Cu(110)
R. Pfandzelter and S. Parhofer 269
Submonolayer growth of Ag on Cu(111) studied by proton induced Auger electron spectroscopy
R. Pfandzelter and J. Landskron 273
Comparative study of ion-induced kinetic electron emission from different nearly-free-electron metals
M. Rösler 278
Transport of swift heavy ion induced electrons in solids
H. Rothard, A. Billebaud, M. Chevallier, A. Clouvas, B. Gervais, J.-P. Grandin, M. Jung and R. Wünsch 284
Electron emission and ion reflection from Mg, Al and Si bombarded with 1–10 keV O^+ and Ne^+ at impact angles between 0° and 84°
K. Wittmaack 288

Section IV. Channeling

Impact parameter dependence of energy loss and charge exchange in ion–atom collisions
N.M. Kabachnik 292
Impact-parameter dependence of resonant-coherent excitation of channeled ions
F.J. García de Abajo and P.M. Echenique 299
Charge exchange and stopping power of channeled heavy ions
T. Azuma, K. Komaki, Y. Yamazaki, N. Kakutani, S. Ninomiya, K. Maki, T. Takahira, M. Sekiguchi, T. Hattori and T. Hasegawa 306
Trajectory dependent charge-state distribution of planar channeled heavy ions
T. Azuma, K. Komaki, M. Yamagata, Y. Yamazaki, M. Sekiguchi, T. Hattori and T. Hasegawa 310
Angular dependence of the electronic energy loss for low energy heavy ions under channeling conditions
S. Gelfort, H. Kerkow, R. Stolle, V.P. Petukhov and E.A. Romanowski 315
Measurements of the random and channeled stopping powers for He ions in InP
D.W. Hetherington 319
Theoretical estimate of the low-energy limit to ion channeling
G. Hobler 323
Quantum chaos in channeling
V.A. Khodyrev 328
Impact-parameter dependence of Barkas correction in energy loss of charged particles
V.A. Khodyrev 332
Decay of zero-degree focusing of channeled ions
L. Miletić, S. Petrović and N. Nešković 337
Ion excitation in binary collisions
M. Moneta 340
The impact parameter dependence of the energy straggling of protons into GaAs
S.T. Nakagawa, L. Thomé, H. Saito and C. Clerc 345
Angular distributions of ions transmitted through a very thin crystal
S. Petrović, L. Miletić and N. Nešković 348
Channeling and steering effects on 2 MeV He^{2+} ions in Ge^+ ion implanted SiGe-alloy layers
P. Songsiriritthigul and G. Holmén 355
Ion channeling in spinel single crystals
A. Turos, R. Falcone, A. Drigo, A. Sambo and Hj. Matzke 359

Section V. Crystal Assisted Processes

Crystal assisted processes in ion channeling
S. Datz, H.F. Krause and C.R. Vane 363

Monte Carlo calculation of characteristics of γ-beams produced by coherent bremsstrahlung at Fermilab
N.Z. Akopov, A.B. Apyan, R.O. Avakian, R. Carrigan, S.M. Darbinian, K.A. Ispirian, Yu.V. Kononets and S. Taroyan 372

Suppression effect of ultrarelativistic electron radiation in a thin layer of substance
S.P. Fomin, A. Jejcic, J. Maillard, N.F. Shul'ga and J. Silva 375

Parametric X-ray radiation by relativistic channeled particles
T. Ikeda, Y. Matsuda, H. Nitta and Y.H. Ohtsuki 380

Crystal alignment and measurement of photon polarization using coherent e^+e^- photoproduction at energies above 50 GeV
A.B. Apyan, R.O. Avakian, S.M. Darbinian, K.A. Ispirian, M.K. Ispirian and S.P. Taroyan 384

Conversion of the linear polarization of gamma quanta beams into circular with the help of lasers and single crystals
R.O. Avakian, S.M. Darbinian, K.A. Ispirian and M.K. Ispirian 387

From "narrow pairs" to relativistic positronium atom: evolution of coherent peaks for type-B photoproduction of electron–positron pairs in a crystal
Yu.P. Kunashenko and Yu.L. Pivovarov 390

Effective positron source based on coherent radiation of relativistic electrons in crystal
V.P. Lapko, I.N. Mondrus, N.N. Nasonov, A. Jejcic, J. Maillard and J. Silva 393

Numerical calculation of parametric X-ray radiation by relativistic electrons channeled in a Si crystal
Y. Matsuda, T. Ikeda, H. Nitta, H. Minowa and Y.H. Ohtsuki 396

Theoretical notes on parametric X-ray radiation
H. Nitta 401

Coherent radiation under regular and chaotic motion of relativistic electrons and positrons in crystals
N.F. Shul'ga and V.I. Truten' 405

Experimental determination of the linewidth of parametric X-ray radiation at electron energies below 10 MeV
J. Freudenberger, M. Galemann, H. Genz, L. Groening, P. Hoffmann-Stascheck, V.L. Morokhovskii, V.V. Morokhovskii, U. Nething, H. Prade, A. Richter, J.P.F. Sellschop and R. Zahn 408

Section VI. Projectile Induced or Assisted Processes

Population of sputtered metastable silver atoms
W. Berthold and A. Wucher 411

Optical studies of defects induced by ion bombardment of alkali halide crystals
Qun Yan, A.V. Barnes, B. Barnes, N. Seifert, R. Albridge and N. Tolk 415

Ion beam defect engineering in semiconductors and optoelectric materials
Z.-L. Wang, Q.-T. Zhao, K.-M. Wang and B.-R. Shi 421

Giant deformation of solids irradiated with swift heavy ions: behavior of amorphous/crystalline multilayers
F. Garrido, A. Benyagoub, A. Chamberod, J.-C. Dran, A. Dunlop, S. Klaumünzer and L. Thomé . . . 430

Ripple topography development on ion bombarded Si
G. Carter, V. Vishnyakov and M.J. Nobes 440

Atomic collision cascades studied with the Crystal-GRID method
M. Jentschel, K.H. Heinig, H.G. Börner, J. Jolie and E.G. Kessler 446

Simultaneous measurements of the reflection, reemission and permeation of particles during low energy deuterium bombardment of niobium
V. Bandourko, M. Yamawaki, K. Yamaguchi, N. Koborov, V. Kurnaev and D. Levchuk 452

Peculiarities and mechanism of the cone growth under ion bombardment
L.B. Begrambekov, A.M. Zakharov and V.G. Telkovsky 456

Molecular dynamics simulation of low energy ion beam mixing
G.V. Kornich, G. Betz and B.V. King 461

1 keV hydrogen implantation in a-Si and c-Si: Physical vs computational modeling
G. Bourque and B. Terreault 468
The diffusion approximation in modelling impurity redistribution during sputtering
G. Carter 473
Linear and nonlinear effects at low energy ion bombardment of solid xenon
Ł. Dutkiewicz, R. Pędrys and J. Schou 478
The effect of the fibre target structure on the spatial distributions of sputtered atoms
W. Eckstein, E.S. Mashkova, V.A. Molchanov and A.I. Tolmachev 482
Simulation of ion-induced mixing of metals
H. Gades and H.M. Urbassek 485
Angle resolved velocity distributions of sputtered aluminum atoms
A. Goehlich and H.F. Döbele 489
Fluctuations in collision cascades: ion beam mixing
M. Hautala, J. Likonen and I. Koponen 493
The bipartition model calculations of sputtering yields for H^+, D^+, T^+ and He^+ ion bombardments on surfaces
Luo Zhengming, Hou Qing and Teng Lijian 497
Empirical approach for the interatomic potential of carbon
E.P. Andribet, J. Domínguez-Vázquez, A.M.C. Pérez-Martín, E.V. Alonso and J.J. Jiménez-Rodríguez 501
Simulation of ion beam assisted deposition of layers on metals
F.F. Komarov, A.F. Komarov and A.M. Mironov 505
Reflection coefficients of D, T ions with Maxwell energy distribution
Luo Zhengming, Hou Qing and Teng Lijing 508
Temperature and dimension of nuclear tracks
R. Maier, R. Wünsch and K.-O. Groeneveld 512
Sputtering of biomolecules by fast heavy ions
Yu.V. Martynenko 515
Interface formation in silicon by cesium bombardment
E.S. Mashkova, V.A. Molchanov, V.I. Shulga, C. Benazeth, N. Benazeth, P. Cafarelli, W. Eckstein and M. Hou 519
Sputtering yield and morphological changes of TiB_2 coatings induced by different incident beams
T. Nenadović, B. Gaković, B. Todorović and T. Jokić 523
Molecular dynamics simulation of ion ranges at keV energies
K. Nordlund and A. Kuronen 528
Simulation of ion reflection and sputtering for plasma-irradiated solid surfaces in an oblique magnetic field
J. Kawata and K. Ohya 532
Atomistic simulation of copper cluster deposition on copper
R.W. Lee, Z.Y. Pan and M. Hou 536
Radiation defects in stainless steel and high-nickel alloy at hydrogen and helium ion bombardment
A.A. Pisarev and B.A. Gurovich 540
Computer calculations of single crystal sputtering by low energy ions
A.A. Promokhov, V.A. Eltekov, V.E. Yurasova, J.S. Colligon and A.S. Mosunov 544
Binding energy effects in cascade evolution and sputtering
M.T. Robinson 549
Frequency noise level of As ion implanted TiN–Ti–Si structures
M. Stojanović, C. Jeynes, N. Bibić, M. Milosavljević, A. Vasić and Z. Milošević 554
Defect production in Si by ion bombardment under the influence of internal mechanical strain
Yu. Suprun-Belevich and L. Palmetshofer 557

High-energy ion-beam mixing: A new route to form metallic nanoclusters in a dielectric matrix
F. Garrido, J.-C. Dran, L. Thomé, C. Meneghini, F. Gonella and A. Quaranta 561
Reflection coefficients of light ions/atoms from solids: comparison of analytical results with simulation codes using the binary encounter approximation
I.S. Tilinin and G. Betz 565
Transient diffusion in ion beam mixing
D.E. Tsatis 569
Surface atomic vacancies created by ion bombardment and desorption
Y. Wei, L. Li and I.S.T. Tsong 572
Defects in metals induced by nuclear collisions and their modifications by swift heavy ion irradiations
Z.G. Wang, Ch. Dufour, E. Paumier and M. Toulemonde 577
The formation of clusters during ion induced sputtering of metals
A. Wucher and M. Wahl 581
Evidence of alkali adatom island formation induced by ion bombardment on a Na covered Pt surface
N. Mandarino, P. Zoccali, P. Riccardi, A. Bonanno, A. Oliva and F. Xu. 590
Elastic energy loss and defect dynamics under swift heavy ion bombardment
Yu.N. Yavlinskii 594

Author index 599
